FMS PRODUCTIVITY SOLUTIONS

SAY **CU** LATER TO STEEL

With Co₂ and laser cutting, traditional steel slats suffer a short life span due to slag build up and high wear rate, which can ultimately affect the quality of parts that are being cut.

COPPER SLAT BENEFITS:

LONGEVITY

Copper slats last up to 2 years versus 3 months on average when steel is used.

MACHINE UP TIME

Don't waste time cutting steel slats to replace your used slats while you could be cutting parts for profit.

IMPROVED PART QUALITY

Bottom splatter and welding of product is reduced leading to improved surface quality on the bottom of the parts.

IMPROVED PART ACCURACY

Accumulating slag can cause an uneven work surface that allows the plate to move during cutting creating inaccuracy.

LESS SLAG

With less slag build up the reduction of machine maintenance is realized.

Carbon Contamination

The use of Copper Slats will reduce carbon contamination on your parts.

Slat Shield Plus

Slat Shield Plus is a dross preventative, it is easily applied, non-toxic, reduces dross build up and reduces slat cleaning time. All while reducing the "load" on your slat cleaner.

Laser & Plasma Consumables

We sell laser and plasma consumables for most major brands, simply send us an inquiry and we will find you what you need!

Rhino Hammer

The **Rhino Hammer** is a small pneumatic tool, that makes de-nesting of small and medium laser/plasma parts much easier and faster!
Reduce your offloading times, increase efficiency!
