Finally, a laser that can **think for you.**

The “brains” behind the **GX-F ADVANCED** Series is the proprietary Mitsubishi Electric artificial neural network technology ***Maisart***, which imitates neurons in the human brain. It uses audio and light sensors to monitor the cutting process in real time, automatically adjusting parameters to optimize cutting performance.

Designed by Mitsubishi engineers and all major components built by Mitsubishi, the **GX-F ADVANCED** Series is one of the **only laser systems in the industry with a single source for service and support.** Visit us at mcmachinery.com
